# Due to Increased Needs, Universal Valve Announces the Addition of New 4" & 5" "Shorty" Offset Adapters

For Immediate Release

(Elizabeth, NJ) October 2016 – Service station equipment manufacturer, Universal Valve Co., recently announced the addition of two new sizes to their "shorty" offset adapter line. Universal recently released a new 4" and 5" offset adapter to their line of 1", 1-1/2", 2", 2-1/2", and 3" models.

Universal Valve's "shorty" offset adapters have been used for over 40 years to compensate for misalignment of dispensers, suction stubs, and dispenser boxes, where space is critical. Universal's offset adapters allow for easy, fast, dispenser up-grades. The offset adapters allow for full flow of fuel with its unobstructed design.

The zinc plated cast iron body construction offers a lower height where space is critical for suction sumps. Universal's "shorty" offsets are specifically designed for low height requirements. They also save time and money during installation and prevent any strain on piping and dispenser boxes.

For more information on Universal Valve and their offset adapters contact them at:
