FOR IMMEDIATE RELEASE

## Universal Valve Co. Announces Release of Pipe Guards and Bollards

(Elizabeth, NJ) August 18, 2009 – Universal Valve Co. recently announced the release of its model number 1983-, Pipe Guards and model number 1984-, bollards. Pipe guards and bollards are designed to protect property and expensive dispensers from traffic collisions.

Universal Valve offers a wide range of pipe guard and bollard sizes to fit any application. All of Universal's pipe guards and bollards are made of schedule 40 pipe and come either primed, ready to be painted, or in stainless steel. Universal's pipe guards come in 3.5" and 4" OD pipe whereas bollards are available in 4" and 6" OD pipe.

Universal Valve's pipe guards and bollards are both made to withstand high impact and defend against accidents. Universal's pipe guards and bollards are designed to be installed at service stations, truck stops, c-stores, banks, and any other facility where protection is needed from vehicle collisions or a barrier is required to control traffic.

Universal's Pipe Guards and Bollards will be displayed, along with many other Universal Valve products, at this year's annual PEI Convention in Las Vegas, Nevada. The convention will be held October 21-23 at the Las Vegas Convention Center.
